OUR LEGACY

Our successful cases:

Now, our Economic Development Program, through projects like Knitting Hope and Solidarity Strawberries, continues to thrive under the independent management of local leaders. This success is made possible by initiatives such as Mision Huascarán, which empower communities to lead and sustain their own growth.

A meeting that changed lives

Our History:

In **2005**, a group of volunteers arrived in a remote Andean region in **Callejon de Huaylas, Ancash**. Reflecting on the reality of the communities, they discovered not only the extreme poverty in the highlands but also a profound desire for self-improvement among the people. This is how Mision Huascarán was born, an organization with a clear purpose: **to empower rural communities to improve their quality of life and foster their development**.

In **2017**, with the inauguration of **Centro de Misiones**, we established a solid foundation to launch our **first social program: Education**.

By implementing **ludic libraries** equipped with internet access, we aim to positively impact hundreds of students, enhancing their academic abilities.

Through complementary education, we strengthen their communication skills, **foster reading comprehension, and develop critical thinking**, which are essential for their integral growth.

Empower from the heart

In the same year, we launched the **Economic Development Program**, initiating two key projects: *Knitting Hope* and, one year later, *Solidarity Strawberries*. Both projects were designed to improve the quality of life in local communities while fostering sustainable development.

Furthermore, we created the **Housing Program** with the goal of enhancing basic living conditions by providing solar panels and improved kitchens.

Nutrition and Healthcare The driving force of change

In **2018**, we expanded our vision with comprehensive programs in **Nutrition** and **Healthcare**. Through our **mobile medical posts**, we grew from **13 to 180 communities**, bringing healthcare to where it is needed most.

In 2020, we launched our **bakery against anemia**: a project that **successfully reduced child malnutrition from 44% to 9%**. Additionally, in the nutrition sector, we implemented diverse activities to combat malnutrition.
